## DETAILED ACTION

Claims 10, 11 and 13-29 are pending in this application.

### *Irradiation Process*

The papers filed on August 5, 2002 (certificate of mailing dated July 30, 2002) have not been made part of the permanent records of the United States Patent and Trademark Office (Office) for this application (37 CFR 1.52(a)) because of damage from the United States Postal Service irradiation process. The above-identified papers, however, were not so damaged as to preclude the USPTO from making a legible copy of such papers. Therefore, the Office has made a copy of these papers, substituted them for the originals in the file, and stamped that copy:

### COPY OF PAPERS ORIGINALLY FILED

If applicant wants to review the accuracy of the Office's copy of such papers, applicant may either inspect the application (37 CFR 1.14(d)) or may request a copy of the Office's records of such papers (*i.e.*, a copy of the copy made by the Office) from the Office if Public Records for the fee specified in 37 CFR 1.19(b)(4). Please do **not** call the Technology Center's Customer Service Center to inquiry about the completeness or accuracy of Office's copy of the above-identified papers, as the Technology Center's Customer Service Center will **not** be able to provide this service.

If applicant does not consider the Office's copy of such papers to be accurate, applicant must provide a copy of the above-identified papers (except for any U.S. or foreign patent documents submitted with the above-identified papers) with a statement that such copy is a complete and accurate copy of the originally submitted documents. If applicant provides such a copy of the above-identified papers and statement within **THREE MONTHS** of the mail date of this Office action, the Office will add the original mailroom date and use the copy provided by applicant as the permanent Office record of the above-identified papers in place of the copy made by the Office. Otherwise, the Office's copy will be used as the permanent Office record of the above-identified papers (*i.e.* the Office will use the copy of the above-identified papers made by the Office for examination and all other purposes). This three-month period is not extendable.

### *Action Summary*

1. The rejection of claims 10 and 11 under 35 U.S.C. 102(e) over Mettler is hereby withdrawn and reapplied under 35 U.S.C. 103(a) over Mettler.

2. The rejection of claims 13-15 under 35 U.S.C. 103(a) over Cronk et al. is being maintained for the reasons stated in the previous office action.

***Response to Arguments***

3. Applicant's arguments filed August 5, 2002 have been fully considered but they are not persuasive.

Applicants argue that Mettler does not disclose or suggest a "method of soothing" and the use of "sensory fragrances capable of reducing the cortisol level of the mammal". It is argued that Cronk et al is drawn to a medical device and not a personal care composition and it does not disclose or suggest a sensory fragrance. With respect to Mettler it is the position of the examiner that although the reference does not explicitly state a "method of soothing" does not mean that it can not have those properties. It is the position of the examiner that since Mettler teaches the same composition then it would have both a pleasing aroma as well as providing a method for soothing a mammal. It is the position of the examiner that although Cronk is drawn to a device it contains a composition of which contains the same ingredients as the claimed invention. As detailed in the previous office actions Cronk does contain the "sensory fragrances" of the claimed invention. Therefore, it would provide the same effects of reducing cortisol levels and soothing mammals, etc.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 16, 17, 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mettler (US 5,891,427).

Column 1, line 11 states that the composition can serve the occupants of a room.

The prior art does not teach the occupants as children of the ages 1 day to 2 years.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to realize that children, even those of the ages of 1 day to 2 years could benefit from the composition. As previously mentioned column 1, line 11 discloses the application serving anyone in the room. Therefore, if it is the position of the examiner that anybody of any age in a room in which the application is being used will benefit from its effects.

#### ***Allowable Subject Matter***

5. Claims 18-22 and 25-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
